Project 3: Team Assignments

Team 1	John Candelario & Ty McConnaughey	Team 2	Ben Johnson & Wyatt Belcher
Team 3	Jayden Foster & Rachel Truesdale	Team 4	Chloe Davis & Younghoon Kang
Team 5	Trey Truitt & Lex Lapish	Team 6	Michael Yan & Danny Foster
Team 7	Jawntae St.Germaine & Owen Egger	Team 8	Elijah McCray & Noah Prohl
Team 9	Jack Hatton & Dylan Minor	Team 10	Maximilian Haljevac & Michael Smith

Above are the team assignments for Project 3. Your team will submit one solution to the project by creating a branch named `submission` in your GitHub Classroom repository that has the version of your program that you want to submit. If you submit it after the due date, you should email me when you submit it so that I know to access your repository.

Separate from your solution each of you will also submit a brief attestation of, in your view, your contributions and the contributions of your partner. Submit your attestation in the Comment section on your Canvas Project 3 submission location. You will need to submit an arbitrary file on your Canvas Project 3 submission location in order to be able to add an entry to the Comment section.

If the perceptions of the two team members is significantly different, I might require that the team members and I meet to discuss the discrepancy. It is possible that the two team members will not receive the same score. I reserve the right to ask any team to also provide an oral demonstration of their solution and how the team members do on that oral demonstration will be a factor in the project score.

The interaction rule for your interactions with people outside of your team follows. *You can talk with people and AIs outside of your team about the general concepts of the project but you cannot look at anyone else's code and no one else can look at your code.*
